Mr. Joseph E. Roberts, President  
Carron and Company  
26700 Princeton Avenue  
Inkster, MI 48141

Dear Mr. Roberts,

In response to your recent concerns regarding Environmental Waste Control, Inc. (EWC) operations.

Please be assured that EWC is and has been diligently pursuing measures to upgrade our facility. In addition, the following procedures have been implemented.

- \* Installation of a temporary scrubber unit to control odor emissions, potentially released from the oil process.
- \* Chlorination of all treated waste water prior to discharge.
- \* Strict process control of EWC operations.

EWC has also submitted detailed plans to the state and federal agencies, for closure (removal) of the Surface Impoundments (lagoons), and ambient Air Monitoring Program.

Unfortunately, these plans require the approval of the state and federal Environmental Agencies, before they can be implemented. While EWC has submitted these plans over a year ago, their approval is still pending.

EWC has also contracted with a consultant, to install a Large Permanent Scrubber System. The plans are currently being submitted to state and local authorities, for review and approval.

Because of the nature of our business we are heavily regulated by local, state and federal agencies.

Mr Roberts, I believe the measure outlined above, shows EWC continued commitment and cooperation. In addition we appreciate your support.

Sincerely,

ENVIRONMENTAL WASTE CONTROL, INC.
